Rework Station with 110W IR under heater. The heating area is 80x60mm². Placement of SMD Chips with Star Tool Technology, incl. Easy Solder software package and Hot Air 05 control unit. The rework set comes together with additional tools for old solder removal and dispensing. It has four high resolution sensor inputs for thermo-couples (Type K).

The machine is a cost optimized solution for manual rework of small PCBs, i.e. for smart phones.
